Instructions

- 1.- Before beginning the installation, please read all directions carefully and verify that all necessary hardware is accounted for. If any parts are missing, stop the installation and contact your distributor immediately.
- 2.- To maintain and care this product keep it clean and do not use abrasive cleaners or polish waxes. We recommend to use only non-abrasive automotive wax such as pure carnauba to avoid scratches and rust.
- 3.- The approximate installation time is 60 min.

NOTE 1: This installation requires notching or removal of the lower bumper valance to install the lower frame brackets. If your vehicle is equipped with factory tow hooks they cannot be retained.

- 4.- Beginning with the driver side, measure outward from the center of the lower bumper valance 17 15/16" and 18 7/16" and mark 2 vertical lines. Measure up from the bottom of the valance 2 3/4" and mark a horizontal line. Verify the measurements then use a utility knife and carefully cut and remove the section from the bumper valance. Measure and repeat the process for the passenger side. **SEE PICTURE 1.**
